

C) Amendments to the Abstract:

Kindly amend the Abstract on page 27 of the original English translation as indicated hereinafter and amended in Marked-Up Version.

ABSTRACT

~~To provide~~ Providing a spacer forming method by which spacers can be securely formed in a predetermined region on a substrate. Ink containing granular spacers is jetted onto a crossing portion of a black matrix 5 in the shape of a lattice. Red pixel R, green pixel G and blue pixel B are formed in the ~~opening s~~ openings of the lattice. The spacer containing ink is jetted onto the spacer forming positions from the nozzle by the ink jetting method. Plural drops of ink ~~7are-7~~ are jetted onto each of the spacer forming positions on one of the opposite ~~substrate~~ substrates E. The gap between the opposite substrates E can be securely maintained at a constant for filling with liquid crystal.
